

UniFi VIDEO[®]

High-Definition IP Video Surveillance System

Scalable Day and Night Surveillance

Advanced Hardware and Optics for 1080p Full HD Video

Powerful Features and Analytic Capabilities

UniFi VIDEO®

The UniFi® Video Cameras G3 represent the next generation of cameras designed for use in the UniFi Video surveillance management system. These cameras offer 1080p Full HD resolution for day or night use and are integrated with the UniFi Video software for powerful and flexible, integrated IP video management.

The cameras are easy to operate and manage using the UniFi Video® software, which is pre-installed on the optional UniFi NVR appliance, or can be downloaded free of charge.

Cameras

Model: UVC-G3-AF

The UniFi Video Camera G3 features clear 1080p video resolution. The ball-joint mount offers flexible 3-axis adjustment and can be mounted indoors or outdoors. The camera has infrared LEDs with an automatic IR cut filter for day and night surveillance. Available as a single- or 5-pack.

Accessories

UniFi VIDEO®

Dedicated Hardware NVR with UniFi Video® Software

Model: UVC-NVR-2TB

The UniFi NVR is a plug-and-play NVR appliance with low power consumption. The UniFi Video software is pre-installed for quick and easy deployment. No additional software is required. Plug the UniFi NVR into the network, go through the configuration wizard, and it is set up and ready to go.

The UniFi NVR has a built-in 2 TB hard drive. This equates to approximately 4800 recording hours at 480p resolution or 1600 recording hours at 720p resolution (numbers can vary depending on the frame rate).

IR Range Extender

Model: UVC-G3-LED

The IR Range Extender is an accessory that enhances the night vision range of the UVC-G3-AF camera.

- Enhances Night Vision Recordings
- Extends IR Range up to 25 m (82 ft)
- Six High-Intensity Infrared LEDs
- Powered and Controlled by the UVC-G3-AF

Connect and power all of your UniFi Video Cameras with a UniFi PoE Switch. The UniFi PoE Switch is a reliable enterprise switch featuring configurable 802.3af/at PoE+.

- Up to 48 Ethernet Ports
- Up to 10G SFP+ Connectivity
- Non-Blocking Line Rate Performance
- Enterprise-Class Reliability

Software

The UniFi Video software is pre-installed on the UniFi NVR for quick and easy deployment. The UniFi Video software can also be downloaded and installed on a Windows or Linux-based system.

Features

Feature-Packed User Interface Accessible from a web browser, the UniFi Video interface was designed to be easy to use yet packed with advanced features. The UniFi Video interface is incredibly intuitive and loaded with powerful features such as detailed statistical reporting, multiple views, versatile camera settings, advanced analytics, and customizable event recordings.

Plug and Play Installation Automatic camera detection in the UniFi Video software makes it easy to install and deploy cameras. UniFi Video Camera settings are integrated into the UniFi Video software. Configure camera settings, reboot the camera, or upgrade the firmware from the UniFi Video interface.

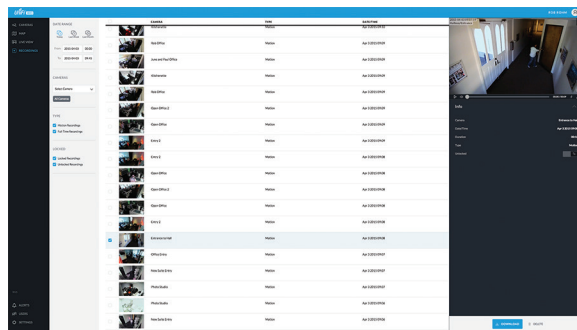

Camera-Based Motion Detection The UniFi Video cameras handle motion detection instead of the server, relieving the workload on the server and ensuring that compression and noise won't affect motion detection.

Additional Live Views Playlists can be created with a configurable live camera feed rotation. Define the cameras you want included in the playlist and how long you want them to appear on the screen before moving on to the next live feed.

Disk Management Features UniFi Video has automatic recording management to free up disk space. User-definable disk space and date-based auto purge allow users to keep a set amount of free disk space or automatically delete recordings after a certain number of days. Another storage feature is the ability to map external USB or network storage drives.

Cost-Effective Solution Shattering conventional industry thinking, Ubiquiti offers UniFi Video's powerful IP surveillance software at no additional cost. No huge upfront costs, no monthly subscription fees.

Mobile App UniFi Video may be accessed from iOS and Android™ using the *UniFi Video* mobile app.

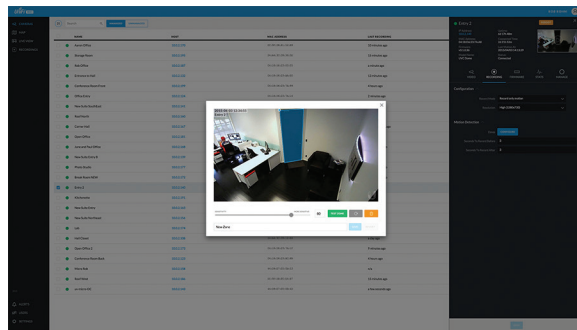

Event Recordings

UniFi Video software provides a variety of options and settings to customize what your cameras record.

Maps

Upload a map of your location(s) or use Google Maps to represent the areas where your cameras are located.

Powerful Analytic Capabilities

Customize your own motion detection zones. You can place several zones and set their alarm sensitivity levels as high or low as the situation demands.
